Data visualization and APIs

What can be used for data visualization?

- <https://mode.com/blog/python-data-visualization-libraries>

- `pip install seaborn`
- `pip install ipython`
- `pip install jupyter`
- `pip install PyQt5 # For linux?`
-

Seaborn

- <https://www.marsja.se/python-data-visualization-techniques-you-should-learn-seaborn/>

Using an API with python

What is an API?

Some good public APIs:

<https://nordicapis.com/best-public-api-of-2018/>

<https://github.com/n0shake/Public-APIs>
